

# Installing Ts

```
npm i typescript
Microsoft Windows [Version 10.0.22621.525]
(c) Microsoft Corporation. All rights reserved.

C:\Users\updat>npm i -g typescript
[ ] | idealTree:npm: sill idealTree buildDeps
```

## Checking the version of the ts

```
C:\Users\updat>tsc --version
Version 5.0.4

C:\Users\updat>
```

## To compile the code use

**tsc => typescript compiler**

```
E:\Teach\Typescript>tsc main.ts
```

**Your main.js file will be created**

**We are converting into type script  
because every browse need to  
compile it**

**In the js the variable will be mostly in the extension of var even though you give that in the in let**
