Last ,LastOrDefault

Last(), LastOrDefault()

✓ Last() and LastOrDefault() both are used (independently) to return last
element from a data source. ●

✓ If the element is not available at last index -

    ✓ Last() will throw an exception.

    ✓ But LastOrDefault() will return default value of data source element.

```
lass Program

    0 references
    static void Main(string[] args)
    {
        List<int> numbers = new List<int>() { 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 };

        //var ms = numbers.Where(x=>x > 15).Last();
        var ms1 = numbers.Where(x => x > 15).LastOrDefault();

        var mixedS = (from n in numbers
                      where n > 15
                      select n).Last();

        Console.ReadLine();
    }
}
```
